

Crypton Green...

Crypton Green...

The good green word.

Both Crypton and Crypton Green fabrics use green chemistry and eco-friendly processes. The only difference between Crypton and Crypton Green is the fiber content of the fabric. Crypton chemistry does not use halogenated FRs, including PBDEs, and is GREENGUARD Certified helping to create healthier indoor environments.

Crypton Green fabrics are constructed with optimized fibers containing one of the following:

- **50-100% recycled polyester**
- **100% heavy-metal-free polyester**
- **100% wool with heavy-metal-free dyes**
- **100% polypropylene**

We continually make environmentally friendly improvements to our plant and processes like reducing our water consumption, purchasing renewable energy certificates and recycling processed materials.
